SCHOOL OPERATIONS ASSESSMENT

A School Operations Assessment includes a broad review of a school’s current operations, verifies best practices that are currently in place, identifies areas in need of improvement, provides comparative data for schools with similar profiles, and offers practical and actionable recommendations.

Mike Waylett conducts our Operations Assessments. He has a successful record of independent school leadership that includes oversight of financial operations, human resources, buildings and grounds, major construction projects, and advancement offices, as well as significant experience with governance issues, strategic planning, and accreditation. During his 40-year career in independent schools, Mike has held senior administrative and head of school roles and has chaired numerous accreditation teams.

AREAS ASSESSED

Business Office/ Finances
- Financial Profile
- Income & Expenses
- Per Student Costs
- Staffing

Enrollment & Financial Aid
- Admissions Funnel
- Financial Aid Administration

- Student Life
SCHOOL OPERATIONS ASSESSMENT

OPERATIONS REPORT

- Overview of current school operations
- Financial assessment & recommendations
- Staffing-level recommendations
- Recommended efficiencies
- Prioritization of recommendations
- Best practices
- Benchmarks—comparison to schools with similar profiles

OPERATIONS DASHBOARD

A comprehensive Operations Dashboard is an important component of the Operations Assessment. During this time of economic uncertainty, the need for schools to make data-driven decisions and take a deep dive into operations is vital to their financial sustainability. The Dashboard examines key metrics and includes school-specific data and comparisons to schools with similar profiles.

Schools may procure this valuable Dashboard as a stand-alone product, independent of the comprehensive Operations Assessment.

- Income & Expenses
- Tuition
- Per Student Costs
- Debt
- Endowment & Giving
- Salaries & Benefits
- Admission Activity
- Financial Aid

When constructing a Dashboard, there is a plethora of data from which to choose. It is essential to select those metrics that will identify trends, determine areas in need of attention, and provide decision-makers with the information they need to assess progress and plan for the future. As new data becomes available, e.g., when updating your NAIS DASL numbers, the Dashboard can be easily updated to ensure the school maintains a well-defined picture of its overall financial health.
SCHOOL OPERATIONS ASSESSMENT
